SMIT 2015 Brno Czech Republic

Dear Madam, dear Sir,

It is our honor to announce the '27th International Conference of the Society for Medical Innovation and Technology (ISMIT) that will be held in the city of Brno, Czech Republic in September 2015.

We expect the upcoming SMIT conference to keep the tradition of previous SMIT conferences and offer excellent scientific and innovative experience for all the specialists and attendants, who will have the chance to share exciting knowledge on state-of-the-art developments, breakthrough equipment and cutting edge techniques. This forum is dedicated to interactions between scientists, mentors and students in the fields of both basic and clinical research, experts in medical technology and computer science, endoscopic and minimal-invasive surgery, interventional radiology, computer-assisted and image-guided therapy and other innovative areas.

Therefore the headline theme of our Conference is: Effective Research and Role of Interdisciplinary Collaboration.

Brno, the second largest city in the Czech Republic, represents a fine blend of history and modern lifestyle. Thanks to number of universities with thousands of students, excellent restaurants and cultural institutions, Brno has a unique "carpe diem" touch. We are looking forward to welcome you in Brno for the International Conference SMIT2015.

Sincerely,

Marek Orban, M.D.
President of the Conference

Marek Orban, M.D.
President of SMIT 2015

Pavel Leinveber, MSc.
Co-President of SMIT 2015

Theme:

Effective Research.

Role of Interdisciplinary Collaboration.

► TOPICS:

- Robotics
- Nanotechnology and Smart Materials
- Simulation and Training
- Reparative Stem Cell Medicine
- Ablation Techniques
- Computer Assisted Surgery
- Imaging and MRI, CT & Ultrasound
- Laser in Medicine
- Navigation
- Nerve Stimulation
- Operating Theater Logistics (OR) and New Technologies

► CLINICAL AREAS:

- Cardiology
- Neurology
- Minimally Invasive Therapy
- Orthopedics
- Neurosurgery
- Obesity and Endocrinology
- Urology
- Gynecology

► SPECIAL TOPICS:

- Data Acquisition, Transfer and Analyses
- Interaction between Basic and Clinical Research
- Commercialization of Research
- International Collaboration and Research Funding
